RAYEN BEN AMOR

WEB DEVELOPER

Tunisia, Nabeul | benamor.rayen@protonmail.com | https://github.com/rynBenAmor | https://rayen-ben-amor.vercel.app/

SUMMARY

I'm a full-stack web developer based in Tunisia with a passion for turning ideas into real, working software. I've built and maintained applications using Django and Vue.js, constantly looking for ways to streamline workflow. While Python is my main strength, I'm always eager to learn new technologies and thrive in collaborative environments, especially alongside a team of creative, like-minded developers.

TECHNICAL SKILLS

Django	HTML/CSS/JS	NGINX
Rest API	Vue.js	Linux
Python	Electron.js	GitHub
SQL		

PROFESSIONAL EXPERIENCE

Web Developer and IT Support Specialist, Sté Fathi Ben Slimene   **Sept 2024 - present**

- Developed and deployed a fully tailored e-commerce platform from scratch, including complex data schemas, mailing systems, web scraping automation, and multi-level user roles and with operational expenses into account.
- Configured and optimized a bare-metal VPS with advanced Nginx setups for performance, security, and scalability.
- Built a lightweight CI/CD pipeline using Bash scripting to automate deployments, migrations, and updates.
- Developed Python/Selenium scrapers to extract product data and images from partner websites, automating the collection process and streamlining product catalog creation.
- Built a CSV import system to sync the local database with the website, eliminating manual product entry, reducing errors, and lowering operational costs.
- Provided IT support across the organization: troubleshooting Windows systems, resolving software/hardware issues.
- Researched, proposed, and implemented solutions that improved day-to-day business operations, acting as the bridge between business needs and technical execution.
- Collaborated with stakeholders to gather requirements, test solutions, and ensure reliable, user-friendly systems were delivered.

Web Developer, Artiplast   **Feb 2025 - present**

- Built a reactive, serverless Vue.js website (showroom) for the company branch presentation and advertisement, deployed on Vercel.

Web Developer, ATGT Tunisie   **Feb 2024 - June 2024**

- Developed a blog platform using Wagtail CMS for my final year project, which sparked my passion for Django and web development.
- Gained hands-on experience with deploying applications on Virtual Private Servers.

Personal Projects & Exploration

- I love experimenting with new technologies, particularly Electron.js, as building self-contained, cross-platform apps fascinates me. I've created several small apps and utility tools, both for friends and personal use, to challenge myself and expand my skills beyond professional experience.
- If you want, I can also make a slightly punchier version that fits neatly into a CV bullet-point style for maximum impact. Do you want me to do that?

EDUCATION

Faculté des sciences Tunis (FST), ICT degree   **2021 - 2024**

Graduated with near-excellent grades with a bachelor's degree in Information technology and Communication

Baccalaureate, Computer Science specialization   **2020**

Graduated high school with a specialization in Computer Science
